

Felix
in the security control

1 Finding the security control

Felix, mummy and Teddy are going on a plane. Before they can board they have to go through security. Felix finds it straight away.

2 Preparing to go through security

Felix must put Teddy, his jacket and his bag in a tray on the baggage belt. He must take his tablet out of his bag and put it in a separate tray. Everyone who travels by plane must do that so that nobody brings anything illegal. Felix gets his things back afterwards.

3 Teddy is scanned!

Teddy sits in the tray and travels towards a tunnel. This is an x-ray machine. The security officers can see through Teddy's body. It's kind of magical - but will Teddy be ok?

4 Going through the metal detector

Everyone must go through a metal detector. It will beep if you wear anything made of metal. Felix goes through first, he doesn't beep. But it beeps when mummy goes through. What will happen to mummy now?

5 Beep! Beep! Another check.

The security officer asks mummy if he can do another check. He feels her clothes, and finds keys in her pocket. This is not illegal, but the detector beeps. Mummy takes out her keys and goes through.

6 Collecting your things - have a good trip!

Now Felix and mummy can collect their things. Felix spots Teddy, who has gone through the x-ray machine. Teddy isn't scared, he thought it was fun. Felix gives Teddy a good bear hug - now they are ready for the flight!
